Recent Mechanical Engineering graduate with a B.Tech from Girijananda Choudhury Institute of Management and Technology, and a diploma in Mechanical (Automobile) Engineering from Kamrup Polytechnic. Experienced in real-world applications through internships with the Assam State Transport Corporation, where I gained practical exposure in the field. Skilled in engineering drawing, SolidWorks, and MS Office, with strong English proficiency. Demonstrated problem-solving abilities through projects, including constructing an Arduino-based surveillance rover and conducting biomass calorific analysis. Eager to apply technical knowledge, creativity, and analytical skills to contribute effectively in a mechanical engineering role.

Work Experience

Service Advisor

Maruti Suzuki Ltd-Guwahati, Assam

Full-time

February 2025 to Present • Full-time

As a Service Advisor, I am responsible for coordinating between customers and the service team, ensuring smooth vehicle servicing, and maintaining customer satisfaction. My role includes diagnosing customer concerns, scheduling repairs, providing cost estimates, and ensuring timely service delivery. I also play a key part in maintaining records and enhancing customer experience through effective communication and problem-solving.

Mechanist

Assam State Transport Corporation-Guwahati, Assam

Internship

March 2021 to April 2021 • Internship

In this span of time I worked on transmission system, fuel injection system and engine overhauling operation. This internship gave a basic idea of how engine works and I hope this will help me a lot in the future for better opportunities.
